Installation Instructions for JDK 5.0

(Pre-requisite for FPU and FVU operation)

System Requirements:

JDK 5.0 application can be installed on Microsoft Windows 2000 and Windows XP. The minimum RAM required is 512 MB. For installing JDK the user has to login as administrator.

Installation procedure:

Copy the Executable file (.EXE) in a folder on C drive. Execute the self-installing executable (by double clicking on the **jdk-1_5_0_07-windows-i586-p.exe** file) to unzip and install the JDK software bundle.

On double clicking the executable file, the application will start to configure the windows installer as shown below.

Fig. (1)

After configuring the windows installer, it will start to install and will show a message as given below.
